SUMMARY

Computer Science graduate with experience in Python, SQL, data analytics, and machine learning through industry experience and financial analytics projects. Built credit risk prediction models and analytics solutions to generate actionable business insights. Seeking to contribute to data-driven decision making in analytics, risk, and product teams.

EXPERIENCE

AI Training Engineer

Apr 2026 – July 2026

Outlier AI

Remote

- Evaluated AI-generated code and natural language responses across multiple production projects using structured quality metrics.
- Analyzed evaluation trends to improve training data quality, model reliability, and instruction-following accuracy.
- Collaborated with cross-functional teams to identify quality issues and support continuous model improvement.

Editorial Coordinator

July 2024 – Aug. 2025

180 Degrees Consulting, Dyal Singh College

New Delhi, India

- Coordinated with consulting teams to develop reports, presentations, and content for client-facing initiatives.
- Managed editorial planning & collaborated with cross-functional teams to ensure timely delivery of project materials.

PROJECTS

Corporate Credit Rating Prediction | *Python, R, SQL, PyTorch, Ordinal Regression*

Sept 2025 – May 2026

- Built a pipeline on financial data from 593 companies (2,029 records) using feature engineering and exploratory data analysis.
- Improved Graph Neural Network (GNN) using threshold-based sampling, increasing benchmark accuracy from 67% to 72%.
- Benchmarked 10+ ML models including XGBoost, Random Forest, & ordinal methods, achieving up to 82.1% accuracy.

FinPulse - Financial Analytics Platform | *Python, FastAPI, PostgreSQL, React, Power BI*

- Built automated ETL pipelines to integrate financial data from 3+ sources, enabling centralized analytics and reporting.
- Designed PostgreSQL database with 15+ normalized tables and developed FastAPI services for scalable financial data management.
- Developed 4+ interactive dashboards and ML-powered analytics modules to support financial insights and data-driven decision making.

AI-Research-Copilot - RAG-based Document Intelligence | *Python, FastAPI, PostgreSQL, React, Power BI*

- Built a (RAG) platform supporting semantic search across 100+ research papers with citation-backed responses.
- Developed document ingestion, vector indexing, and retrieval pipelines using FAISS and Sentence Transformers for accurate document search.
- Designed FastAPI APIs & interactive Streamlit interface enabling multi-document querying with reduced hallucinations.

EDUCATION

University of Delhi

New Delhi

Bachelor of Science in Computer Science, Minor in Mathematics

Aug. 2022 – June 2026

TECHNICAL SKILLS

Languages: Python, C/C++, SQL

Data Analytics & Engineering: pandas, NumPy, Power BI, ETL, DuckDB, Prefect, PostgreSQL, EDA, Excel

Machine Learning: scikit-learn, XGBoost, PyTorch, TensorFlow

Development: FastAPI, Streamlit, Git, GitHub
